Ticket Information

Ticket ID	LAB-002
Date	May 31, 2026
Technician	Cannon Ozongwu
Category	App Deployment/ Intune
Priority	Medium
Status	Resolved

Ticket Summary

The user reported that 7-Zip was not installed on their device. Investigation revealed the app had not been added to Microsoft Intune or assigned to the user. The app was packaged, uploaded, and deployed through Intune to resolve the issue.

Environment

Tenant	CannonITLab.onmicrosoft.com
Device	INTUNE-LAB-WIN11
OS	Windows 11 Enterprise
MDM	Microsoft Intune
Policy	7-Zip (Line of Business / Win32)

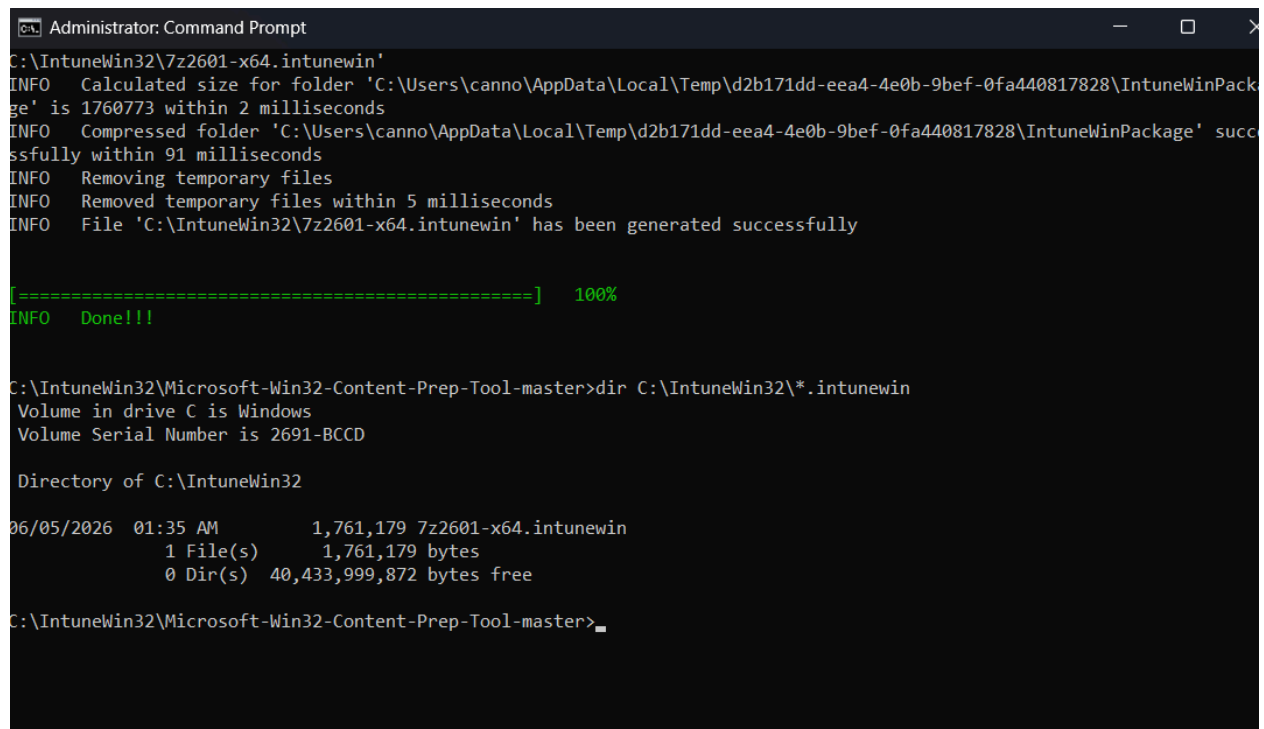

Steps Taken

1. Logged into intune.microsoft.com and navigated to Apps > All apps > Add.
2. Selected Windows as the platform and Windows app (Win32) as the app type.

3. Downloaded the 7-Zip 26.01 x64 installer from [7-zip.org](https://www.7-zip.org).
4. Downloaded the Microsoft Win32 Content Prep Tool from GitHub.
5. Packaged the installer using IntuneWinAppUtil.exe, making a 7z2601-x64.intunewin file.
6. Uploaded the .intunewin file to Intune and configured app details including name, publisher, and version.
7. Set the install command to 7z2601-x64.exe /S and install behavior to System.
8. Configured detection rule using file path C:\Program Files\7-Zip\7zFM.exe.
9. Assigned the app to All Users under Required deployment.
10. Triggered a manual sync on the device and monitored deployment status in Intune.
11. Confirmed 7-Zip was successfully installed on the endpoint..

6. VM confirmation — 7-Zip installed in Start menu or Program Files

Resolution

7-Zip was successfully packaged and deployed through Microsoft Intune as a Win32 app. The app install status confirmed successful installation on the target device. The user's request was fulfilled with no further action needed.

Notes & Lessons Learned

The Microsoft Store app (new) option did not return results for 7-Zip, so the Win32 packaging method was used instead. The Win32 Content Prep Tool converts any .exe or .msi installer into a .intunewin file that Intune can deploy and track. Detection rules are very important because without them, Intune cannot confirm whether the app installed successfully.
