

IT Help Desk– Ticket Documentation

Home Lab Portfolio Project | Cannon Ozongwu

Ticket Information

Ticket ID	LAB-004
Date	June 4th, 2026
Technician	Cannon Ozongwu
Category	Device Management / Remote Wipe & Retire
Priority	Critical
Status	Resolved

Ticket Summary

A company laptop was reported lost by an employee. To protect sensitive company data, I initiated a Retire action via Microsoft Intune to remove company data and unenroll the device from MDM, keeping personal data safe.

Environment

Tenant	CannonITLab.onmicrosoft.com
Device	INTUNE-LAB-WIN11
OS	Windows 11 Enterprise
MDM	Microsoft Intune
Policy	Retire (MDM unenrollment)

Steps Taken

1. Received critical ticket reporting a lost company laptop requiring immediate remote action

2. Evaluated whether to Wipe or Retire — determined Retire was appropriate for this scenario to remove company data while preserving personal data.
3. Logged into intune.microsoft.com and navigated to Devices > All devices.
4. Located the affected device and opened the device details page.
5. Took a screenshot of the device in its enrolled/active state for documentation.
6. Clicked the Retire button in the device action menu and confirmed the action.
7. Monitored the device status in Intune until it reflected the retire action.
8. Confirmed the device was removed from the Intune device list.
9. Restored the VM from snapshot to re-enroll for future lab scenarios.

Screenshots

1. Enrollment tab showing device status as Succeeded before retire action

The screenshot displays the Microsoft Intune admin center interface. The left sidebar shows the navigation menu with 'Enrollment' selected. The main content area shows the 'Enrollment' tab for the device 'DESKTOP-4NVVU61'. The status is 'Succeeded'.

Profile name	User principal name	Profile type	State	Filters
Default	CannonOzo@CannonITLab.onmi...	Device type enrollment restriction	Succeeded	
Default	CannonOzo@CannonITLab.onmi...	Enrollment status page	Succeeded	
Windows Backup and Restore profil	CannonOzo@CannonITLab.onmi...	Windows Backup and Restore	Not Applicable	

2. Device page showing Retire button in the action toolbar

The screenshot shows the Microsoft Intune admin center interface. The left sidebar contains navigation links: Home, Dashboard, All services, Explorer, Devices, Apps, Endpoint security, Agents, Reports, Users, Groups, Tenant administration, and Troubleshooting + support. The main content area is titled 'Home > Devices | All devices' and shows the details for device 'DESKTOP-4NVVU61'. The 'Overview' tab is selected, displaying a search bar and a toolbar with actions: Retire, Wipe, Delete, Remote lock, Sync, Reset passcode, Restart, Fresh Start, Autopilot Reset, Quick scan, Full scan, and Update Windows Defen. The 'Essentials' section lists device properties: Device name (DESKTOP-4NVVU61), Management name (CannonOzo_Windows_6/5/2026_4:52 AM), Ownership (Personal), Serial number (VirtualBox-50f46a68-f701-4b64-8679-8f8f6038d2da), Phone number (---), and Device manufacturer (innotek GmbH). The 'Device actions status' table is empty, showing 'No data'.

Action	Status	Date/Time	Error
No data			

3. Device status showing Retire pending in Intune

The screenshot shows the Microsoft Intune admin center interface. The left sidebar contains navigation links: Home, Dashboard, All services, Explorer, Devices, Apps, Endpoint security, Agents, Reports, Users, Groups, Tenant administration, and Troubleshooting + support. The main content area is titled 'Home > Devices | All devices' and shows the details for device 'DESKTOP-4NVVU61'. The 'Overview' tab is selected, displaying a search bar and a toolbar with actions: Retire, Wipe, Delete, Remote lock, Sync, Reset passcode, and Ri. The 'Retire pending...' status is highlighted in the toolbar. The 'Essentials' section lists device properties: Device name (DESKTOP-4NVVU61), Management name (CannonOzo_Windows_6/5/2026_4:52 AM), Ownership (Personal), Serial number (VirtualBox-50f46a68-f701-4b64-8679-8f8f6038d2da), Phone number (---), and Device manufacturer (innotek GmbH). The 'Device actions status' table shows the 'Retire' action with a 'Pending' status.

Action	Status
Retire	Pending

4. Device not found page confirming successful unenrollment

5. Access work or school showing MDM account removed, Entra ID connection intact

Resolution

The Retire action was successfully completed. MDM enrollment and company data were removed from the device. The Entra ID connection remained intact as expected. The device was removed from the Intune device list confirming full unenrollment.

Notes & Lessons Learned

Retire removes MDM enrollment and company data but preserves personal data, making it the correct choice for BYOD offboarding or lost devices where personal data should not be destroyed. The wipe performs a factory reset and should only be used for confirmed lost or stolen corporate-owned devices. Always confirm device ownership type before taking either action. In an actual environment both actions would most likely require manager approval and full ticket documentation before proceeding.
