Home Lab Portfolio Project | Cannon Ozongwu

Ticket Information

Ticket ID	LAB-005
Date	June 5th, 2026
Technician	Cannon Ozongwu
Category	Conditional Access / Sign-in Block
Priority	High
Status	Resolved

Ticket Summary

The User reported being unable to sign into company resources and receiving an access blocked message. It was revealed that a Conditional Access policy in Entra ID was blocking the sign-in. I identified the policy through the sign-in logs, diagnosed the cause, and resolved the block by modifying the policy assignment.

Environment

Tenant	CannonITLab.onmicrosoft.com
Device	INTUNE-LAB-WIN11
OS	Windows 11 Enterprise
MDM	Microsoft Intune
Policy	Entra ID > Conditional Access + Sign-in Logs

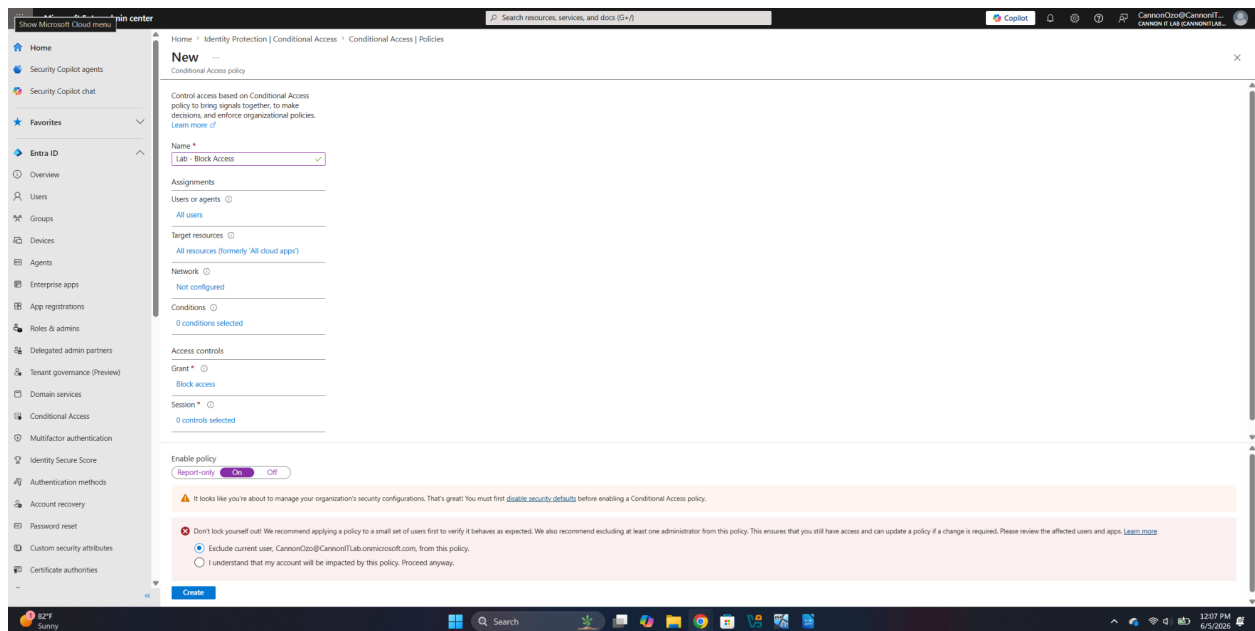

Steps Taken

1. Received ticket from user reporting access blocked error when signing into company resources.

2. Logged into entra.microsoft.com and navigated to Protection > Conditional Access > Policies.
3. Identified the Lab - Block Access policy assigned to All Users.
4. Navigated to Entra ID > Users > Sign-in logs to find the specific blocked sign-in event.
5. Opened the sign-in log entry and reviewed the Conditional Access tab to confirm which policy caused the block
6. Evaluated the policy — determined the block was either intentional (misconfigured) or unintentional (user incorrectly included).
7. Resolved the block by modifying the policy assignment to exclude the affected user or by disabling the policy.
8. Confirmed the user was able to sign in successfully after the policy change.
9. Documented the policy change and sign-in log findings in the ticket.

Screenshots

1. Conditional Access policy showing Lab - Block Access assigned to All Users and enabled

2. Access blocked error message received by the test user

Flag sign-in errors for review: [Disable flagging](#)

If you plan on getting help for this problem, enable flagging and try to reproduce the error within 20 minutes. Flagged events make diagnostics available and are raised to admin attention.

3. Sign-in log entry showing failed sign-in for test user

The screenshot displays the Microsoft Entra admin center interface. The left sidebar shows the navigation menu with 'Users' selected. The main area is titled 'Users | Sign-in logs' and shows a list of sign-in events. The first entry is highlighted, showing a failed sign-in for the 'Test User' on 6/5/2026 at 12:29:11 PM. The 'Status' is 'Failure' and the 'Sign-in error' is 'S3003'. The 'Activity Details: Sign-ins' pane on the right provides more information about the failed sign-in, including the 'Request ID', 'Correlation ID', 'Authentication requirement', 'Agent Type', 'Status', 'Continuous access evaluation', 'Sign-in error code', 'Failure reason', and 'Additional Details'. The 'Failure reason' states: 'Access has been blocked by Conditional Access policies. The access policy does not allow token issuance. If this is unexpected, see the conditional access policy that applied to this request in the Azure Portal.' The 'Additional Details' section lists various attributes like 'User', 'Username', 'User ID', 'Sign-in identifier', 'Session ID', 'App owner tenant ID', 'Resource owner tenant ID', 'User type', 'Cross tenant access type', 'Application', 'Application ID', 'Resource', 'Resource ID', and 'Resource tenant ID'.

4. Conditional Access tab inside sign-in log showing Lab - Block Access as the cause

The screenshot shows the 'Activity Details: Sign-ins' window with the 'Conditional Access' tab selected. The tab displays a table with columns: 'Policy Name', 'Grant Controls', 'Session Controls', and 'Result'. The first row shows 'Lab - Block Access' with 'Block' grant controls and a 'Failure' result. Below the table, a message states: 'A sign-in can also be interrupted (e.g. blocked, multifactor authentication challenged) because of a user risk policy or sign-in risk policy. Currently, this tab only lists Conditional Access policies.'

Policy Name	Grant Controls	Session Controls	Result
Lab - Block Access	Block		Failure

5. Policy disabled — Lab - Block Access toggled Off

The screenshot shows the Microsoft Entra admin center interface. The left sidebar contains navigation links for Home, Security Copilot agents, Security Copilot chat, Favorites, Entra ID, Overview, Users, Groups, Devices, Agents, Enterprise apps, App registrations, Roles & admins, Delegated admin partners, Tenant governance (Preview), Domain services, Conditional Access, Multifactor authentication, Identity Secure Score, Authentication methods, Account recovery, Password reset, Custom security attributes, and Certificate authorities. The main content area is titled 'Conditional Access | Policies' and includes a search bar and a list of policies. The 'Lab - Block Access' policy is highlighted, showing it is created by 'user', has a state of 'Off', and was created on 6/5/2026 at 12:18:39. The policy is currently disabled.

Policy name	Created by	State	Alert	Creation date	Modified date
Lab - Block Access	user	Off		6/5/2026, 12:18:39 ...	6/5/2026, 12:45:35 ...

6. Successful sign-in to myapps.microsoft.com after policy disabled

The screenshot shows the Microsoft My Apps dashboard. The left sidebar contains navigation links for My Account, My Apps, My Groups, and My Access. The main content area is titled 'Apps dashboard' and includes a search bar and a list of apps. The 'Add-ins' app is highlighted, showing it is created by 'user', has a state of 'On', and was created on 6/5/2026 at 12:18:39. The app is currently enabled.

App name	Created by	State	Alert	Creation date	Modified date
Add-ins	user	On		6/5/2026, 12:18:39 ...	6/5/2026, 12:45:35 ...

Resolution

The Conditional Access policy blocking the user's sign-in was identified via Entra ID sign-in logs. The policy was disabled, restoring access to company resources. The test user was able to sign into myapps.microsoft.com successfully following the change. Ticket closed.

Notes & Lessons Learned

The Entra ID sign-in logs are the most efficient tool for diagnosing Conditional Access blocks. The Conditional Access tab within each log entry shows exactly which policy triggered the block and the result. In an actual environment, disabling a Conditional Access policy should always be approved by a senior admin or security team first, as it affects the entire tenant's security posture. The correct solution in production would typically be to exclude the affected user from the policy rather than disabling it entirely.
