

Microsoft Intune Helpdesk Lab

Portfolio Project
Cannon Ozongwu | Cannon IT Lab

About This Project

This portfolio documents a five-scenario Microsoft Intune help desk labs built from scratch on a personal tenant. Each scenario simulates a real-world help desk ticket, from initial report through investigation and resolution, and is documented with screenshots and ticket writeups.

The lab was built using a Microsoft 365 Intune trial tenant, a Windows 11 Enterprise evaluation VM in Oracle VirtualBox, and Microsoft Entra ID. All scenarios were completed hands-on with no guided walkthroughs and troubleshooting was performed independently throughout with no escalation.

Ticket Summary

The User reported being unable to sign into company resources and receiving an access blocked message. It was revealed that a Conditional Access policy in Entra ID was blocking the sign-in. I identified the policy through the sign-in logs, diagnosed the cause, and resolved the block by modifying the policy assignment.

Lab Scenarios Summary

Ticket	Scenario	Category	Status
LAB-001	Device flagged non-compliant — BitLocker not enabled	Endpoint Compliance	Resolved
LAB-002	User reports app not installed — 7-Zip deployment	App Deployment	Resolved
LAB-003	User locked out — BitLocker recovery key retrieval	Account Reset	Resolved
LAB-004	Lost device — remote retire and MDM unenrollment	Device Management	Resolved
LAB-005	User blocked from sign-in — Conditional Access policy	Conditional Access	Resolved

Skills Demonstrated

Microsoft Intune	Compliance policies, app deployment, device management, remote actions
Microsoft Entra ID	Device enrollment, sign-in logs, Conditional Access policy creation
Windows 11 Enterprise	BitLocker, MDM enrollment, Access work or school, PowerShell
Win32 App Packaging	IntuneWinAppUtil.exe, .intunewin packaging, detection rules
Troubleshooting	MDM enrollment failures, BitLocker TPM limitations, CA log analysis
Documentation	Professional ticket writeups, screenshot evidence, resolution notes

Lab Environment

Tenant	Microsoft 365 Intune Trial — CannonITLab.onmicrosoft.com
VM	Windows 11 Enterprise Evaluation (90-day) in Oracle VirtualBox
MDM	Microsoft Intune (intune.microsoft.com)
Identity	Microsoft Entra ID (entra.microsoft.com)

Each scenario is documented in a separate ticket file (LAB-001 through LAB-005) with screenshots and resolution notes.
